Subject: San Jacinto National Remedy Review Board

Scott,

The EPA has scheduled a National Remedy Review Board (NRRB) meeting for the San Jacinto River Waste Pits Superfund Site. The NRRB reviews proposed high-cost cleanup decisions to help evaluate whether they are consistent with current law, regulations, and Agency policy and guidance. The meeting is scheduled for April 28, 2014.

The NRRB is a technical and policy review group made up of members that have experience with both regional and Headquarters perspectives in the Superfund remedy selection process. Its members include senior managers and technical experts from each EPA region, as well as senior technical and policy experts from other EPA offices. The product of the review is a memorandum sent from the Board to the regional Superfund division director that documents the Board's recommendations about the proposed cleanup strategy.

The Technical Advisory Group may prepare a summary in writing, 20 pages or less, any technical issues they believe are pertinent to the cleanup decision, including your recommended approach and rationale for that approach. I will attach this summary to the site information package that will be submitted to the Board no later than Wednesday, April 2, 2014. Also, the summary will be made a part of the Administrative Record for the site.

Please let me know if you have any questions on this.

Regards,

Gary Miller

EPA Remedial Project Manager
